Marisol,

While I'm out on detail the Cahto Tribe's concerns with a closed landfill adjacent to tribal lands is going to come up. Damian has background on the most recent EPA-level conversations on the subject, and the attachments reflect those discussions. More recent info is in an email from Steve Wall, below.

Steve Wall in the Zero Waste team (he sits around the corner) knows everything about the site, and is our technical lead on the matter. Kathy Taylor is the Branch Chief (Bridget's counterpart) who has primary responsibility for this issue. Elsewhere in Land Division, our seasoned toxicologists have weighed in on data gathered by the Tribe to date. Apparently supplemental sampling is ongoing, and we may be asked to again review data.

Copying Michelle and Bridget, for awareness!

**Subject:** FW: Laytonville Landfill - Issue for CalEPA/CalRecycle

FYI,

The Laytonville landfill is heating up for CalEPA and CalRecycle. Bradley Angel is representing the Cahto Tribe now and he appears to be asking CalEPA/CalRecycle for additional sampling at/around the landfill and consideration of clean closure. Zoe Heller in her new CalRecycle role is getting pulled into it and asked me for some background information on the review we did in December/January. I forwarded her a copy of the report we were asked to review in December last year and the analysis of it that Kathy Baylor did of that report. (Both the report and Kathy's review are in the attached emails).

Here's a quick snip from Kathy's review:

Five soil samples and three groundwater samples were collected and analyzed in 2016. Although this was a relatively small data set, the analytical results provided in the report (mostly minor hits of metals) and the site history do not support the contractor's proposed scope of work for further investigation. The contractor, Ahtna

Facility Services Inc, has proposed an extensive soil and groundwater site investigation (pages 8-16) that does not appear warranted based on available data and history for the site.

Hi Steve,

Great talking to you earlier this week!

Laytonville is heating up here. Tribe's requesting sampling. Any chance you can share the contractor report?

Mark and I are briefing the director tomorrow am.

Thanks,  
Zoe
